The upcoming educational activities of Turkish Geriatrics Society are, 10th Basic Geriatrics Course which will be about Nutrition for Older Persons in September 22nd, 2018 and Aging Spine Symposium in October 16th, 2018, both in Ankara.

In daily clinical practice attempts to provide older persons with adequate nutrition encounter many practical problems. Based on this issue, not only the evaluation of their nutritional requirements, but healthy nutrition principles will be discussed during the 10th Basic Geriatrics Course.

World Spine Day, taking place on October 16 each year, has become a focus in raising awareness of spinal issues. Aging Spine Symposium will cover the problems of the seniors in a multidisciplinary manner. All the details of this course and the symposium are announced on the web site of Turkish Geriatrics Society and the members of the Board of Directors are honored to invite you to these scientific events.
